

# SIGNS IT'S TIME TO SCHEDULE PAVING WORK

- Cracks are spreading or forming large, interconnected patterns
- Potholes or surface breakouts are appearing
- Water is pooling or drainage is poor
- Pavement surface is faded, brittle, or heavily worn
- Uneven areas or depressions are developing
- Sections feel soft or are sinking under traffic
- Edges are crumbling or breaking away
- Previous repairs are failing or recurring
- Pavement is 15–25+ years old without major work
- Maintenance costs are increasing year over year

## CONTACT US TODAY.

A representative will follow up to review your list, answer any questions, and help determine the ideal time of year for your project.
